

BST Solutions

Solution 1:

Time Complexity : $O(n)$

Space Complexity: $O(n)$

```
import java.util.*;
```

```
class Solution{
```

```
    static class Node{  
        int val;  
        Node left, right;  
    };
```

```
    static Node newNode(int item){  
        Node temp = new Node();  
        temp.val = item;  
        temp.left = temp.right = null;  
        return temp;  
    }
```

```
    static int sum = 0;
```

```
    static int rangeSumBST(Node root, int low,  
                             int high){  
        if (root == null)  
            return 0;
```
